

AI for Leaders Workshop

How should leaders think about AI in their organisation?

This course provides leaders with a foundational understanding of Artificial Intelligence (AI), enabling them to make informed strategic decisions. It debunks AI myths, explores its value-driven application, and provides guidance on best practices for AI governance, risk management, and operational readiness. Practical applications, including AI tools like ChatGPT, Copilot, and AI agents are covered.

Workshop Details

Cost: \$3600

Duration: 4 hours

Format: In-person, interactive workshop

Size: 1-20 people

Workshop Outline

1) Strategy and Governance
